SPECIAL SECURITY CENTER

1. Within the last year there has been extensive high level discussion concerning the mission and function of the Special Security Center. [REDACTED] has pushed quite hard for a Special Security Center assigned directly under the DCI, with increased responsibilities in the intelligence community on all codeword and SI matters.

25X1A

2. The Office of Security has adopted the position that there should not be "two Security offices" and SSC should remain under the command, control, and cognizance of the Director of Security. At the same time, we have attempted to sidestep the "SI" problem.

3. As of 23 January 1973 the Executive Director Comptroller established a Task Group under the chairmanship of [REDACTED] to head a Task Group to look into the entire problem. [REDACTED] is presently assigned to the [REDACTED] "Working Group" and he is going almost full time on the project. [REDACTED] is the DD/M&S representative on the Management Panel. The complete project will take about a year to complete.

25X1A

25X1A

4. It is suggested that the Reorganization Task Force might look into this problem, if the Director of Security approves the recommendation. It would be a separate study, following the 1 May 1973 deadline. The thrust of this study would be to take a fresh look at this on-going struggle, in terms of the new environment, and the community responsibilities of the new DCI.
